AIWI

Automated Intelligent Workflow Infrastructure.

A new-age file transfer solution for the publishing and print industry

WIDEN streamlines workflow and facilitates seamless file transfer. It creates a smooth interface between editorial CMS and the various processing modules.

1. Cloud-Based

Access from any point on the globe through a browser

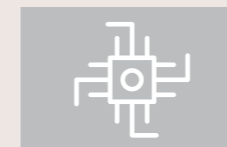

2. Centralized Console

A centrally managed console that collates information across servers at different locations with activity audits, intelligent reporting, and monitoring features.

3. Proofing Monitor

Enable the editorial team to approve or reject pages before they are processed for printing. The monitor logs user approvals/rejections with name, time, and machine IP for easy tracking.

4. Hardware Monitor

View and monitor the real-time statuses of satellite modules installed at the editorial locations. The monitor highlights the faulty servers in red colour for you to take action.

5. Process Monitor

View details of the file being processed and each satellite component at different locations. Aid automated file transmission through various stages of the workflow and get alerts for file errors or system failures.

6. Editorial Monitor

View the real-time overview of the changes, released, and to-be-released pages. Monitor the pages with a color-coded plan indicating updated, revised, accepted, or rejected page statuses

7. Engineer's Monitor

A monitoring screen for the engineering team to track incoming pages and their print status. Alter-page profiles for special editions and re-transmit pages with new configurations to the destination press site.

8. Contract Printing

Print in-house products at outside locations or vice versa, outside products at in-house locations. WIDEN intelligently decide the transmission flow of Contract Printing Product with an inherent file transmission logic.

9. Log-Book & MIS

Generate reports on resource utilization, optimization, transmission of editions, page bunching, daily MIS, etc.

Benefits

Transparency across all teams

Automated file transfer capabilities

Centrally managed architecture

Real-time updates and alerts

Disaster recovery features

Customizable dashboard

Harns Technologies

Live Wire

Lastest News Hub

Instant hub for headlines from Multiple sources

Live Wire is your instant hub for all the latest headlines from various sources in one single place.

1. Centralized News Aggregation

Get access to fresh news from different sources in one place.

2. Ai-enabled Content Selection

From thousands of feeds, Live Wire AI content assistant selects the best and most relevant headlines for you.

3. Stay Ahead. Every Second.

Stay ahead of other publishing houses in delivering the latest news without any delays.

AdLob Workflow

Ad Bookings and Management

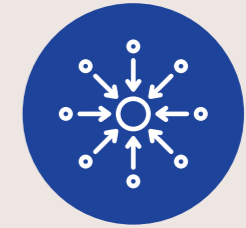

Effortless ad management at your fingertips.

AdLob is the most trusted cloud digital Ad Acceptance and Delivery System, streamlining and automating ad workflow and booking process.

1. Centralized Ad Acceptance

Streamline ad acceptance with Adlob's centralized platform, ensuring optimal quality and productivity. Seamlessly process bookings, record key data, and simplify your workflow.

2. Enhance Transparency

Gain a comprehensive view of every stage in the ad booking process, ensuring clear visibility and informed decision-making at every step.

3. Agency module to track and book

An all-inclusive dashboard for advertisers to easily book, manage, and access ads, including archives. Real-time tracking allows advertisers to monitor their ads at every processing stage for up-to-the-minute insights.

2. Streamlined Integration: Edit, Plan, and Manage with Ease

Adlob offers centralized integration with your edit, planning, and ERP modules. This means a cohesive, hassle-free workflow that ensures all your processes work in perfect harmony.

Archist

News Archival Repository

Preserve History: The Ultimate News Archival Repository

Safely store and preserve priceless collections of old newspapers. Centralize and access your historical news assets in one secure location.

1. Economical and Secure Content Archiving

Secure your valuable content cost-effectively, with the confidence that your data is protected and accessible whenever you need it.

2. Elastic Search on Content

Empower users with advanced search tools to find what they need effortlessly. Search by keywords, topics, phrases, and more for precise results

3. Tailored-based Time & Role-based access

Define permissions and ensure efficient, controlled access to your valuable content.

4. Seamless Subscriptions

Seamless access to premium content through subscriptions, offering exclusive insights and engagement for subscribers.

HarnsPod

Automated Podcast Generator

The First-Ever AI-powered platform,
Generating Automated Podcasts

Generate Automated Podcasts for Any Content
Site with Just a Few Clicks.

“ Effortlessly Transform Your CMS Content, Website Articles, Epaper, and More into Rich Human-Generated Podcasts with Just a Few Clicks.

1. Turning web articles into engaging Podcasts directly from your website

Experience the transformation of web articles into captivating podcasts right on your website, bringing news to life through audio.

2. Monetization
